Harold,

I spoke with Mr. Roder on this and he was confused as to what work the aerial photos may be showing; he admitted that they mowed one field and take hay off it, and the other site they are preparing to use as a firing range for the security staff at the nuke plant. He's stated they have not brought in any fill to any of their locations, but have been composting some wood chips.

I wanted to make sure that we are talking about the same parcels that are of concern to us, so I emailed him some of our aerial photos, as well as the NWI map for the area - Mr. Roder stated he knew there were many wetlands in the general area (he estimated 50%), but he seemed surprised that we believed his sites might be wet as well. This entire area was owned by Camp Perry until the late 1960s.

I'm waiting for his comments on the aerials.

Joe K.

Paul was able to drive by the site yesterday but could not see any alleged activity as all of the alleged hills are reportedly occurring north of a series of buildings. He was however able to identify some of the land marks reported in the alleged violations and did note a dump truck in the general area of the alleged violations but could not follow it.

The other property owner involved is a Michael Such who owns the parcel directly to the east. This alleged violation was previously forwarded in April 2012 but I could not locate any information in ORM. I will re-send the Such information in a second e-mail.

Refer to the attached drawings entitled Site Figure which includes the approximate latitude/longitude for the alleged violations. All the alleged violations are occurring north of Front Street at and adjacent to the Erie Industrial Park. Based upon the aerials and the information received it appears EPG2 LLC which has a mailing address of 4267 E Konker Road, Port Clinton, Ohio 43452. Reportedly this property is leased and used for weapons testing by ARBS, Inc which has a mailing address of 818 Front Street, Lake Erie Busines Park, Port Clinton, Ohio 43452. According to the Ottawa County Auditors website the ARBS property is owned by Erie Machine & Engineering LLC, 4267 E Konker Road, Port Clinton, Ohio 43452 which is the same mailing address of EPG2 LLC.

Paul and I have been able to pull some information together which we believe narrows the properties in which the alleged violations are occurring in the Erie Industrial Park. There appears to be approximately four different violations and possibly two to three different property owners. It appears some of the files begin in 2009, 2011 and 2012.
